

G. Michaels Consulting Ltd. and DBDOC

Over 30 years experience providing custom upgrades and retrofits for process control systems across North America has given G. Michaels Consulting Ltd. a unique perspective on the industry. Our flagship product, DBDOC, was developed to address the need for a comprehensive view of disparate system resources in process control systems. Since we created it in 1996, we have continued to improve DBDOC by adding features requested by our customers, and providing support for the complete ABB®/INFI 90® family of systems. The result is a truly high quality, full-featured product, which has garnered an enthusiastic response among DCS system users worldwide.

Our Clients

DBDOC is in active use in a wide variety of industries around the globe. If you are considering DBDOC for your operation, please contact us, we would be happy to put you in touch with DBDOC customers with systems similar to your own. For a list of our clients, visit gmcl.com/clients.
